OXYCLOG OB

The clog that meets all your needs

The Oxylog has a rubber outsole which ensures maximum grip on both wet and dry surfaces and is compliant with the SRA non-slip standard. The clog was specially designed for the operating room and can be sterilised at high temperatures without deformation in an autoclave (at 135°C) and is washable (90°C). The Oxylog features an anti-static insert that facilitates the dissipation of static electricity, and complies with the antistatic standard ESD.

Autoclavable

Can be sterilized in an autoclave.

Chemically & UV sterilizeable

This shoe is chemically and UV sterilizeable.

Washable 90°C

These shoes can be washed in a washing machine at 90°C.

Waterproof materials

Waterproof materials make you capable of escorting patients into the shower in a safe and hygienic way.

SRA slip resistance

Slip resistance is one of the most important features of safety and occupational footwear. SRA slip resistant soles are tested on a ceramic tile with dilute soap solution.

Electrostatic Discharge (ESD)

ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance between 100 KiloOhm and 100 MegaOhm.

Industries:

Medical, Food & beverages, Cleaning

Environments:

Dry environment, Extreme slippery surfaces, Uneven surfaces, Wet environment

Maintenance instructions:

To extend the life of your shoes, we recommend to clean them regularly and to protect them with adequate products. Do not dry your shoes on a radiator, nor nearby a heat source.
